Technical Skill

- Game Testing
- SQL
- Jenkins
- GitHub
- XML
- JIRA - defect tracking tool
- Automation Programming
- Debugging and Issue Tracking
- Operating System Windows7/8/10/ios/android

Soft Skill

- Observation
- Decision making
- Communication
- Multi-tasking
- Collaboration and Teamwork
- Attention to Detail
- Strong Analytical and Problem-Solving Skills
- Excellent Communication Skills

Education Background

- Visvesvaraya Technological University
BE in Computer Science
Completed in 2015
- JNV School
Completed in 2011

About Me

Highly skilled and dedicated Game Tester with 3 years of experience in the gaming industry. Demonstrated expertise in game testing, feature responsibility, LiveOps, and collaborating with design, development, and BI teams. Proficient in SQL, Jenkins, GitHub, XML, and automation programming. Seeking new opportunities to contribute my skills and passion for gaming to drive quality and player satisfaction.

Professional Experience

DECA GAMES | Embedded Game Tester 2020 – Present

Key responsibilities:

- Performed thorough testing of the RotMG (Realm of the Mad God) PC game for both MAC and Windows platforms.
- Responsible for specific features, ensuring they met quality standards and adhered to design specifications.
- Collaborated closely with design, development, and LiveOps teams to identify and address issues and improve the gameplay experience.
- Utilized SQL to run queries and retrieve logs for debugging purposes, ensuring smooth gameplay and identifying potential performance bottlenecks.
- Leveraged Jenkins to build and configure game environments.
- Utilized Git and GitHub actively participating in branching, pushing, and rebasing to manage the codebase efficiently.
- Proficiently worked with XML files to configure and modify game settings and configurations.

MatryxSoft | Manual Tester/Automation Programmer 2018–2020

- Knowledge of Jira - defect tracking tool and test case
- Developed automation scripts using the Ascentional test tool, streamlining the testing process and improving efficiency.
- Collaborated with the testing team to identify areas for automation and implemented solutions accordingly.
- Conducted regular code reviews and maintained a high standard of code quality and documentation.
- Worked closely with cross-functional teams to ensure automation aligned with project requirements and timelines.

Techarro soft solution | Manual Tester 2016–2018
